## Wind Up

No replacement batteries or bulbs required – ever!

A twist of the wrist means you'll always have a handy light when you need it with a handy way to charge your mobile in an emergency too!

Environmentally friendly and money saving, the convenient, compact, with a solid ergonomic design this is an essential gadget to keep in your pocket, glovebox or bag.

### LED Torch

Switch the button to upwards to turn on the light. Switch the button downwards to turn it off.

### Charging the torch

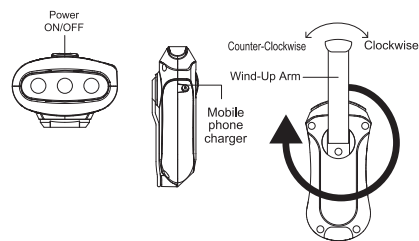

- Always place the switch in the OFF position before charging
- Fold out the wind-up arm from the base of the unit.
- Rotate the handle using a steady motion in one direction only, but this can be either clockwise or counter clockwise.
- Fold the handle back down after charging.
- Do not insert the charging cable when you are winding the handle.
- It is recommended that you charge the torch regularly for optimum performance and to prevent deep discharging.

### Charging your mobile phone

- Insert the charging cable into the wind-up unit.
- Select the adapter that is compatible with your mobile phone and insert the other end of the charging wire into this.
- Connect the wind-up charger to your mobile phone.
- Crank the handle the same way as shown in the diagram shows to charge your mobile phone.
- Do not leave the charging cable connected to the wind-up unit when not using it to charge your phone.

### Specifications

- Rechargeable Li battery, 3.6V, 40mA - Output voltage: 4.8V±0.5V; Current: 100mA
- Charging frequency: 120rpm/min.
